

AURUM ADVENTURES

Features

- Spectacular Skippers Canyon
- Off-road biking and/or 4WD
- Jetboating
- Gold mining history, hands-on
- Rafting
- Helicopter assisted option available

Start your day with full-on action, mountain biking an exciting downhill canyon road.

Others who prefer begin their day a little more sedately can sit back and enjoy the views on a 4WD trip along the famous Skippers Road, originally built by hand in the 1800s by the early gold miners.

Meet up for a exhilarating jet boat ride through the upper reaches of Skippers Canyon. Then kick back with a picnic lunch amongst the most spectacular scenery made famous in the Lord of the Rings films.

Visit a private gold mining museum and park, created by the descendants of one of the original prospectors families who still live in this isolated canyon. Learn to pan for gold with an expert. Get hands-on with old mine workings and equipment, see a sluice water cannon in operation, even swing a pick!

Cross a scary ravine swingbridge and look down into an unusual slot gorge from high above.

AURUM ADVENTURES...

Top off the afternoon with a fun-filled gentle rafting/kayaking trip, suitable for all ages, from 3 to 103. Or continue the gold mining theme with a visit to the site of an original miners township and explore the abandoned cottages and huts.

There are a number of lovely walks in this area and you can choose to spend more of your day simply exploring or mountain biking more trails. The adventurous can include an all-action whitewater rafting trip.
